

Image shows hydrosight underwater window on 6m depth in a ROV testing tank.
Curtesy of krist design, Norway

Hydrosight Corp. specializes on underwater windows for marine applications and swimming pools. We are a small, young team of engineers and technicians, who love to work with water. Our clients are located in the nicest spots on this planet - we have the chance to make something special and unique for them. Every day of work is different. Each day you go home and know what you have achieved.

As an applicant you should be available a minimum of 2 days per week. We work Mo-Fr. 8:30-17:00. Full time is also an option for us.

Hydrosight office is in Emmerich am Rhein, approx. 15Km commute by bus or car

Pos.1. Engineering Draftsman

Construction 2D/3D, making blueprints (CAD), purchasing. Other assignments are possible, also manual labor in production.

Pos.2. Technical Sales

customer care international, help with book keeping, calculation, tender preparation, telephone service

Your qualifications

- You should speak English, German is an advantage.
- We prefer mechanical engineering students.
- Good computer skills
- Good written and oral communication skills.

How to apply: Send an email to hr@hydrosight.com with a short introduction. Don't be shy! We are looking forward to hear from you! Dipl-Ing(TU) Moritz Meinesz
